

THE DOOR OF BEAUTY & INNOVATION

ABOUT PLASTPRO

We choose a door for its aesthetic qualities, but doors offer so much more than a cohesive look for our homes. Our front doors are the gateway to welcoming guests and loved ones. From ushering us into the start of the day to welcoming us back to our homes and families at the end of the day, doors are an important and impactful part of the house. They reflect our style and offer protection for the people that matter most. We want you to choose a door that best represents you, makes you feel secure, and fits your needs.

Since 1994, Plastpro has focused on providing a superior product with the best value, technology, and commitment to our customers. Wood and steel doors were historically preferred in the industry, but both come with long-term problems, such as rotting, rusting, and weather damage. Our fiberglass doors are the best solution for these longevity issues. They are not susceptible to weather damage, require less maintenance, and offer higher performance ratings. We've introduced the first door with composite stiles and rails, HydroShield Technology, and composite Polyfiber (PF) Frames to the industry. Our doors feature a full-length LVL block that provides stronger rigidity and allows a range of door locks and hardware to be installed for increased security. We carry a wide variety of designs, sizes, and styles to elevate any home.

From the beginning, we've been committed to providing superior products and to creating opportunities. Our goal is to create positive change for our employees, customers, and our community. We believe in doing good for the world and making a difference. For us, success is only as good as the good it creates. We've continuously partnered with Habitat for Humanity to create affordable, green houses for low-income families across the nation. We've donated more than 500 doors to various chapters of Habitat for Humanity and other non-profit organizations. With a Plastpro door, you not only acquire a beautiful door with the best quality, you join us in giving back to others.

TESTING INFORMATION

PATENTED HYDROSHIELD™ TECHNOLOGY

Our exclusive HydroShield Technology protects our doors against moisture and humidity infiltration by creating a fully composite barrier that encases and protects the door on all six sides. It prevents warping, delamination, corrosion, rotting, and the buildup of mold and mildew. When paired with our Polyfiber (PF) Door Frames, our doors with HydroShield Technology create an impenetrable entryway.

1 FIBERGLASS REINFORCED DOOR SKIN

Our exclusive formula is measured precisely to ensure each skin is produced to the highest quality. We offer many stunning design options, and customized panel configurations are possible. The skins require little maintenance and will not splinter, dent, warp, rot, or rust. Choose a door skin from a variety of grains that can be painted or stained.

2 FULL-LENGTH COMPOSITE STILES

Our full-length, composite stiles protect the door from external moisture to prevent warping or rotting. They have twice the screw-holding strength of wood.

3 COMPOSITE TOP & BOTTOM RAILS

High-strength, composite top and bottom rails prevent moisture from seeping into the door and stop the buildup of mold.

4 EXTENDED LOCKBLOCK

Plastpro's full-length LVL allows any type of lock to be placed for increased security. Our 8/0 doors have a steel bar in addition to the LVL to help increase the structure's rigidity.

5 POLYURETHANE FOAM CORE

Our advanced, CFC-free, high-density, polyurethane foam core enhances the door's soundproofing capabilities and provides insulation up to six times greater than wood doors.

BACKED BY WARRANTY

We are proud to offer one of the best warranties in the industry. Plastpro products are held to high standards. We stand behind our products and guarantee the best quality to meet your performance expectations.

PFT™ DOOR FRAMES

To have a complete entry system, it is important to consider the material of the door frame. Many doors are hung in either wood or steel frames, which are prone to the same problems as the doors themselves. Wood frames can warp, rot, and crack, while steel frames can rust and dent. You don't want to install a door that will fail, nor do you want to install a frame that will fail.

Plastpro's Polyfiber (PF) Door Frames offer an innovative alternative to traditional door jambs. Our uniquely formulated door frame combines the beauty of wood with the strength of steel. The material is durable, long-lasting, and is more thermally resistant than either wood or metal. The advanced system can be installed the same way as traditional wood jambs with no added hassle. When a fiberglass door is used with a PF Frame, they create an impenetrable entryway.

FEATURES AND BENEFITS

- Equipped with HydroShield Technology, it will not absorb or wick moisture, and prevents warping, rotting, and splitting.
- Frame cannot be infested with termites at any point along the structure.
- Has twice the screw holding power of traditional wood door frames.
- More versatility in design. Available in various lengths and widths that can be stained as well as painted.
- Continuous piece with no finger joint and is 25 percent more rigid than wood frames.
- Maintenance free and energy efficient.

DOOR SERIES OVERVIEW

Craftsman Series • Saker Fir • DRF3F

Plastpro’s Standard Door Series’ offer a wide selection of fiberglass entry doors that feature the beautiful look of wood, with a longer lifespan. Offered in a variety of rich, grain textures, our fiberglass doors require less maintenance, offer longer warranties, and are more energy-efficient than traditional wood or steel entry doors. To set ourselves apart from both traditional entry door materials and our competitors, Plastpro doors are equipped with HydroShield Technology, which creates a full, composite barrier that encases and protects the fiberglass door from moisture on all six sides.

This innovative and durable design is available in the look of any wood grain you could desire- from traditional Oak and Mahogany, to contemporary Fir, with several options in between. For those who prefer the more minimal look of a steel door, we also offer our Smooth Series, with no grain pattern. Our Standard Door Series’ also include flush glazed and direct glazed options that maximize natural light.

LIMITED SERIES

Our Limited Series was specifically created to showcase some of the richest, most luxurious graining available.

MODERN SERIES

The Modern Series makes contemporary curb appeal an effortless achievement.

CRAFTSMAN SERIES

The Craftsman Series pulls design inspiration from 20th century architecture, for simple and classic statement doors.

RUSTIC SERIES

Our Rustic Series was designed to provide classic charm, while bringing traditional, upscale appeal to any home.

MAHOGANY SERIES

The Mahogany Series combines a beloved, wood texture with timeless styles for a traditional, warm addition to the home.

OAK SERIES

The rich, grain texture of our Oak Series will give any home a classic look.

SMOOTH SERIES

Our Smooth Series doors are made with a pre-pigmented, white skin. Its simplicity gives a modern design and feel to any home.

WHITE OAK SERIES

The White Oak Series combines the best features from our Smooth and Oak Grain doors. Any home can enjoy a rich, oak texture in a pre-pigmented, white skin.

ONELITE SERIES

Our Onelite Series features a fine, flush glazed glass with a removable stop to allow the glass to be switched without changing the entire door.

NOVA SERIES

The Nova Series features glass that is directly glazed into the door. This design creates a seamless blend between the glass and door, allowing the most scenery and natural light into the home.

Nova Series • DRS1E80L • SLS1E80L • Glass LowE

SPECIALTY SERIES

Plastpro’s Specialty Series is a selection of fiberglass door models from our standard series that have been created to test and comply with specific safety and performance standards. Our Specialty Series includes Fire Rated, Trimmable, HVHZ Impact, Residential ADA, and Commercial ADA compliant models. (For Commercial ADA doors, see p.136-141).

Read more about each category available in the series below. Please note the icon that represents each category here. If you see this icon below a model on one of our standard series pages, that means the door is also available as a specialty item. For example, if a model is marked with a flame below, it is available as both a standard and Fire Rated door. Please contact us or look at www.plastproinc.com for Specialty Series sizing, as the specialty models may not be available in every standard model width.

FIRE RATED

Made with fire-resistant composite, Plastpro’s Fire Rated doors are extremely durable. Our doors are tested and comply with safety and performance standards to withstand fire for a minimum of 20 minutes. Certain models are available to hold off fire for a minimum of 60 and 90 minutes.

 = 20min option available

 = 60min option available

 = 90min option available

Contact us for stock availability.

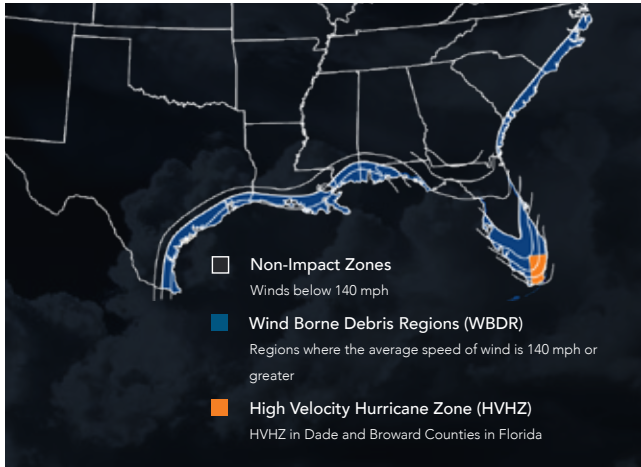

TRIMMABLE

Our Trimmable Series is designed to fit in a variety of existing entryways- perfect for remodels with non-standard sizing. Contractors can make adjustments up to 2” in height and width to the door. Trimmable doors are available in Oak and Smooth skins.

 = Trimmable Option Available. Contact us for stock availability. (Only available in 3’0” width)

HVHZ IMPACT

Plastpro’s High Velocity Hurricane Zone (HVHZ) Impact Doors are created, tested, and certified to meet the most stringent wind and impact code requirements in the nation. Our innovative R&D Department has pioneered a unique, patent-pending process whereby a missile-proof shield is built in to reinforce the door.

 = HVHZ Option Available. Contact us for stock availability.

RESIDENTIAL ADA

Our Residential ADA doors are offered in a variety of compliant styles. The Residential ADA Series features a 10.25” bottom rail that allows for a generously sized kick plate (up to 10” tall) to be installed on a range of our popular doors, in many designs and sizes. We can also include reinforced blocking through a special order.

 = Residential ADA Option Available. Contact us for stock availability

A beautifully designed entryway helps set the stage for the rest of the home and creates a welcoming passage from public space to private abode. Nothing accompanies that transition better than our exclusive glass designs, which improve the look and value of your home.

Our doorlites are composed of a piece of decorative glass sealed between two pieces of tempered safety glass that provides exceptional security, soundproofing, and thermal performance. The state-of-the-art Warm Edge spacer system provides a seal that protects and insulates your door and home for years to come. Unlike the competition, our metal coming includes a gasket that cushions and protects the glass from chipping, cracking, and rattling during door movement.

INSULATING SYSTEM

All Plastpro Decorative Doorlites are made with Super Spacer® Cushion Edge™, a flexible, U-shaped, silicone foam tape product used to wrap around and cushion our center decorative panel. Featuring a vapor barrier backing, the product, when used in combination with Hot Melt butyl, provides a superior Warm-Edge seal.

FEATURES AND BENEFITS

- Warm-Edge Benefit: Superior silicone foam insulation, low thermal conductivity
- Silicon Foam Features: Excellent UV resistance and extreme temperature performance
- Dual-Seal Performance: Chamfered corners for increased sealant depth
- Tempered Safety Glass for your peace of mind

GLASS CAMING OPTIONS

Our exclusive glass designs are offered with different coming options to match a variety of hardware finishes.

WROUGHT IRON

PATINA

ZINC

CAMELIA

CAMING: WROUGHT IRON TRANSOM: AVAILABLE

Camelia’s wrought iron curves create symmetry, uniformity, and a sense of balance. Against a waterfall textured background, the design gives the exterior of your home a modern and sophisticated charm, while delivering the ultimate level of privacy.

- 1. Wrought Iron
- 2. Waterfall Tempered Glass

ARTESANO BREEZE

CAMING: ZINC TRANSOM: AVAILABLE

Artesano’s subtle hint of amber colored glass creates a warm, welcoming feeling in any home. This arrangement is the ideal balance between a simple pattern and an artful combination of textures.

- 1. Clear Hammer (100HS)
- 2. Zinc Caming
- 3. Clear Bevel
- 4. Sea Spray

PRISCILLA

CAMING: WROUGHT IRON TRANSOM: AVAILABLE

Priscilla’s smooth, swirl design pays tribute to Renaissance style. A combination of wrought iron and bubble glass lend the design a touch of grandeur, which is perfect for adding elegant flair to any home.

- 1. Wrought Iron
- 2. Little Bubble Tempered Glass

BRENTWOOD

CAMING: ZINC OR PATINA TRANSOM: AVAILABLE

A classically inspired arrangement, our Brentwood glass epitomizes style. With bevel swirls and a bold centerpiece, all outlined by a crystal granite border, Brentwood can be appreciated in any home.

- 1. Baroque
- 2. Clear Bevel
- 3. Bright Zinc or Patina Caming
- 4. Granite

CASTILE

CAMING: PATINA TRANSOM: AVAILABLE

Inspired by the historic Spanish kingdom, Castile is an ornate, baroque style glass that balances the intricacy of its centerpiece with a straight-lined, beveled border. Castile is the epitome of modern design.

- 1. Granite
- 2. Baroque
- 3. Patina Caming
- 4. Beveled

SOLSTICE

CAMING: PATINA TRANSOM: AVAILABLE

Our Solstice pattern is a beautiful, simple arrangement of frosted glass bordered by patina coming- designed to leave a lasting impression.

- 1. Sable 3.0 MM Outer Border
- 2. Clear Pencil Bevel for Inner Border
- 3. Sable Bevels Center Background
- 4. Patina Caming

KENSINGTON

CAMING: PATINA TRANSOM: AVAILABLE

Kensington brings a classic, English charm to any door. A combination of frosted glass and subtle line patterns creates a distinctly beautiful glass.

- 1. 100 Water
- 2. Clear Bevel
- 3. Narrow Reed
- 4. Sandblasted Glass
- 5. Patina Caming

SPRING

CAMING: PATINA TRANSOM: AVAILABLE

This chevron pattern arrangement incorporates clean lines and two-toned glass colors. Named for the pale gray, water-like glass texture that gives a sense of renewal reminiscent of spring.

- 1. Light Water
- 2. Clear Chord
- 3. Patina Caming
- 4. Pale Gray Water

The Solution Doorlite Series is perfect for those who want a completely unique front door. These doorlite frames have a flat, modern profile and are available in multiple sizes with six different glass options, making it easy to create a custom, contemporary design.

The screwless design eliminates holes and plugs and saves valuable installation time. The frame features a patented interlocking joint and compression seal that adheres to the door and creates a powerful compression seal and bond. It safely locks decorative glass in place, while beautifully illuminating and bringing out the features of the glass.

The Solution Doorlite Series was created to complement our Shaker doors from the Craftsman Series, and are available in a white or tan textured, vertical, grain pattern.

TEXTURED GLASS OPTIONS

CLEAR / LoE

WHITE LAMINATE

SANDBLAST

SABLE

ROOFTOP

NARROW REED

FEATURES AND BENEFITS

- No unsightly plug or screw holes
- Available in white or tan
- Textured, vertical grain pattern
- Matches various architectural styles
- Shaker-style low profile
- Patented frame system
- Built to resist warping
- Easy installation- saves on labor cost

SPEAKEASY & HINGE STRAP

The Open Speakeasy adds an eclectic, but polished, flair to a Plastpro Rustic Series door. Meanwhile, the Industrial Speakeasy takes you back in time to Prohibition days, with an ornate, grill design that adds extra charm and individuality. The simple, wrought iron bars add a bold, custom detail.

Plastpro’s Hinge Straps are a simpler way to style your Rustic Series door. The durable, aluminum material is resistant to rust and discoloration, keeping the bold, black pop of detail intact.

18" Hinge Straps

OAK GRAIN

SMOOTH FINISH

To maximize natural light without hassle, our Onelite Series features a fine, flush glazed glass with a removable stop to allow the glass to be switched without changing the entire door. These doors are available with beautiful and energy-efficient low-emissivity glass.

ALL DOORS ARE SHOWN PRE-FINISHED

This model complies with ADA standards and can accommodate ADA required hardware for easy operation. Reinforced blocking and closures allow the following flexible hardware to be installed: panic bars, reinforced arm closures, and exit rim devices. These devices are easy to grasp with one hand and don't require tight grasping or twisting to operate.

NOVA SERIES

DOOR OVERVIEW

The Nova Series features glass that is directly glazed into the door to create a seamless blend between the glass and door. The large glass pane allows the most scenery and natural light into your home. This generous portion of glass is available in two models: the 45 with a traditional, Craftsman sticking, in a Smooth or Fir skin, and the 90 with a modern, Shaker sticking and Brushed Smooth finish.

MATERIALS NEEDED

PLASTPRO'S PRE-FINISHED KITS OR

- A. Pre-Mixed Stain (1/2 pint)

B. Mineral Spirits (4 fl. oz.)

C. Top Coat/Sealer (20 fl. oz.)

D. Two Clean Cloths

E. One Pair Protective Glove
- F. 3" China Bristle Brush

G. Two Stir Sticks

H. Two Skin Samples

I. Finishing Instruction

PAINTING INSTRUCTIONS FOR OAK GRAIN DOORS

STEP 1: SURFACE PREPARATION

1. Lay door horizontally on saw horses or a table.

2. Remove all the hardware and mask off anything you don't want stained, such as the glass insert.

3. DO NOT SAND GRAINED FIBERGLASS / PF™ DOOR FRAMES

4. Wipe the Door / PF™ Door Frame with mineral spirits to clean any dust or residue from the surface. Allow door surface to dry completely before applying stain.

STEP 2: STAIN APPLICATION

1. Starting at the center of the Door / PF™ Door Frame, stain one to two panels at a time. Apply stain with a 3" to 4" soft bristle brush, or rag. Apply enough stain to fill the Door / PF™ Door Frame grain.

2. With a clean, lint free 24" x 24" cloth, softly wipe the surface until you reach your desired tone.
TIP: When the rag becomes saturated with stain, refold to work with a less saturated section. Be sure to use the same rag for the whole Door / PF™ Door Frame.

3. After all stain is brushed evenly, you may ad finishing touches by using a small 1" to 2" brush or cotton swabs.

4. (If desired) Allow the Door / PF™ Door Frame to dry for at least 48 hours before applying another coat. Then, repeat above process.

STEP 3: PROTECTIVE TOP COAT

- Application of polyurethane top coat with UV inhibitors like ZAR™ Exterior polyurethane, Wood Kote® Flagship UV, or Minwax® Fast Drying Polyurethane for exterior applications.

1. After stain has completely dried (48 hours) mix the top coat well and apply evenly using a clean, dry 2" soft bristle brush or 3" foam brush. Be sure to stop when the grain changes direction.

2. Apply two or three coats of finish, allowing at least 24 hours of drying time between each application.

IMPORTANT NOTE

- It is considered normal maintenance to re-apply the topcoat approximately every two years. Even a well-finished fiberglass door will be affected by exposure and weathering from sun, moisture, and air pollutants.

• Staining instructions are for Oil-Based, Premium Quality Wood Stains or similar product designed for use on a fiberglass surface. Please note the instructions indicated are specific to the Zar brand stain included in our stain kit. Please reference stain manufacturer's instructions before applying any stain

MATERIALS NEEDED

- A. Lint-free cloth

B. Mineral Spirits

C. Rubber gloves

D. Masking tape
- E. 4" Bristle Brush

F. For water-based application: acrylic-based primer*/ acrylic latex-based exterior grade paint.

We recommend using Sherwin-Williams PrepRite® Bonding Primer with compatible acrylic-latex paint for optimal paint adhesion.

PAINTING INSTRUCTIONS FOR OAK GRAIN DOORS

STEP 1: SURFACE PREPARATION

1. Lay door horizontally on saw horses or a table.

2. Remove all the hardware and mask off anything you don't want painted, such as the glass insert.

3. DO NOT SAND GRAINED FIBERGLASS.

4. Wipe the door with mineral spirits to clean any dust or residue from the surface. Allow door surface to dry completely before applying stain paint. Do not use hydro-carbon based solvents to clean the surface as such products may leave a residue.

5. Apply primer with a 4" brush beginning with the panels. Follow the manufacturer's instructions for drying time before applying topcoat. Continue to apply the primer to ALL 6 sides. Doors which have been bored and mortised for hardware should be primed inside of the lock bore as well.

6. The primer must be completely dry before applying the topcoat.

STEP 2: PAINTING

1. Apply exterior grade paint with a 4" brush beginning with the panels.

2. It is common practice to paint both stiles the same color as the exterior side of the door. If applying a second coat, follow the manufacturer's instructions for drying time between coats.

3. Continue to apply the top coat to ALL 6 sides of the door which have been bored and mortised for hardware-should be finished inside of the lock bore as well.

CAUTION

1. When using stains, mineral spirits, paints, or other hazardous materials, always read and follow the manufacturer's instructions. Plastpro, Inc. makes no representations as to the proper use of other manufacturers' products.

2. When working with paints or solvents, make sure the working area is well ventilated.

3. Keep away from heat and flame as materials may be combustible.

4. Paints or solvents may cause skin and eye irritation. Avoid contact with skin and eyes.

5. Keep out of reach of children.

IMPORTANT NOTE:

- It is considered normal maintenance to re-apply the topcoat approximately every two years. Even a well-finished fiberglass door will be affected by exposure and weathering from sun, moisture, and air pollutants.

MATERIALS NEEDED

- A. Lint-free Cloth

B. Mineral Spirits

C. Rubber Gloves

D.Masking Tape
- E. 4" Bristle Brush

F. For water-based application: acrylic-based primer* / acrylic latex-based exterior grade paint.

G.Scotch Brite Pad (Fine) or 320-400 grit sandpaper
(For Smooth Doors Only)

We recommend using Sherwin-Williams PrepRite® Bonding Primer with compatible acrylic-latex paint for optimal paint adhesion.

PAINTING INSTRUCTIONS FOR DOORS & PF™ DOOR FRAMES

STEP 1: SURFACE PREPARATION

1. Lay door horizontally on saw horses or a table.

2. Remove all the hardware and mask off anything you don't want painted, such as the glass insert.

3. Smooth Doors only. Lightly scuff/sand the surface with a Scotch Brite pad or fine sand paper. DO NOT SAND GRAINED FIBERGLASS.

4. Wipe the door with mineral spirits to clean any dust or residue from the surface. Allow acetone to dry from the surface before applying.

5. Do not use hydro-carbon based solvents to clean the surface as such products may leave a residue.

6. Apply primer with a 4" brush beginning with the panels. Follow the manufacturer's instructions for drying time before applying topcoat. Continue to apply the primer to ALL 6 sides. Doors / PF™ Door Frames which have been bored and mortised, or machined for hardware should be primed inside of the lock bore, or prepped area as well.

7. The primer must be completely dry before applying the topcoat.

STEP 2: PAINTING

1. Apply exterior grade paint with a 4" brush beginning with the panels.

2. It is a common practice to paint both door stiles, or both PF™ Door Frame sides, the same color as the exterior side of the door. If applying a second coat, follow the manufacturer's instructions for drying time between coats.

3. Continue to apply the top coat to ALL 6 sides of the door which have been bored and mortised for hardware- should be finished inside of the lock bore as well.

CAUTION

1. When using stains, mineral spirits, paints, or other hazardous materials, always read and follow the manufacturer's instructions. Plastpro Inc. makes no representations as to the proper use of other manufacturers' products.

2. When working with paints or solvents, make sure the working area is well ventilated.

3. Keep away from heat and flame as materials may be combustible.

4. Paints or solvents may cause skin and eye irritation. Avoid contact with skin and eyes.

5. Keep out of reach of children.

IMPORTANT TO NOTE

- It is considered normal maintenance to re-apply the topcoat approximately every two years. Even a well-finished fiberglass door will be affected by exposure and weathering from sun, moisture, and air pollutants.

ASTM D1761	Screw holding capacity.
NWWDA TM-7	Cycle slam test.
NWWDA TM-8	Hinge load resistance test.
ASTM E 283	Air infiltration.
ASTM E 331 / E 547	Water resistant.
ASTM E 330	Uniform structural load.
ASTM E1886 / E1996	Impact / cycle test.
AAMA 1304	Forced entry resistance test.
TAS 201	Impact test.
TAS 202	Air / water / structural test.
TAS 203	Wind pressure cycle test.
NFRC 100 / 200 / 500	Energy efficiency.
ASTEM E90 / STC / OITC	Sound transmission.
ULC 10 C / NFPA 252 / ASTM E 2074	Fire rated.
CDPH / EHLB METHOD V1.1 2010	Volatile organic chemical emission test.
JIS Z 2801:2001	Antimicrobial products test.
ASTM D1413-07	Antifungal wood plastic composite test.
CSFM 12-7A-1	Exterior wildfire exposure test.
AAMA 1702	Exterior door test for manufactured housing.
AAMA 920	Operating cycle test.
AAMA / WDMA / CSA 101 / I.S./A440 (NAFS)	North America fenestration test.

The PLASTPRO DOOR met requirements for sawing, planing, routing, boring, drilling and chiseling. For more specific results, please see our website at www.plastproinc.com or contact our Customer Service Department at 1 (800) 779-0561.

WARNING: These products may include styrene, titanium dioxide, and wood dust, which are known to the State of California to cause cancer. For more information go to www.p65warnings.ca.gov
