

1600 Series

1610 Vinyl Patio Door

Energy Efficiency, Beauty, and Peace of Mind

The 1610 Vinyl Patio Door offers superior style and traditional craftsmanship with features like adjustable, encased bearings and optional French Rail styling. This crafted style is made even stronger through advanced engineering details like a welded vinyl mainframe and panel design. Additional options include Blinds Between the Glass and the Instinct™ One-Motion® handle making the 1610 Patio Door a top-of-the-line patio door solution. Impact resistant glass is available on our 6068 size door.

The MI Windows and Doors 1600 Series is a complete line of windows and doors designed for energy efficiency, comfort, beauty and peace of mind. 1600 Series windows are available in double-hung, slider, casement, awning, picture window and architectural shapes configurations.

Glass Options

TMAX™ insulated glass packages are offered as an upgrade to help you save heating and cooling costs while keeping your home more comfortable. In warm weather, TMAX reduces solar heat gain, minimizing interior glare and lowers interior glass temperature, saving energy and making your home more comfortable. In cool weather, TMAX provides outstanding thermal performance with warmer interior glass surfaces to help save energy and maintain comfort during a cold winter.

Meets ENERGY STAR® requirements in North, North-Central, and South Central Zones.

Blinds Between the Glass

The unique Blinds Between the Glass option offers a quality solution for patio door treatments. Engineered for ease of use, the internal design makes raising and lowering the blinds a snap. The blinds are sealed between the glass offering, longer life, and eliminate the need for dusting. Sizing limitations apply to the Blinds Between the Glass option. Please consult your sales representative.

Instinct Handle

The Instinct Handle option features One-Motion operation, allowing the homeowner to unlock and open the door in a single motion; in reverse, the door closes and locks in the same single motion. The modern, innovative design doesn't extend into the glass area and eliminates the need for a separate lever.

Grid Options

Flat and sculptured grids are available in standard and custom patterns.

11/16" Sculptured Grid (between the glass)
